

Direct Ship Drug Program

AmeriHealth Administrators offers a Direct Ship Drug Program to our in-network physicians. Under this program, physicians can order certain specialty drugs that are given in the office and are eligible for coverage under the plan member's medical benefit when medical necessity criteria are met. AmeriHealth Administrators contracts with specific specialty drug vendors who provide these medications at no cost to our network physicians.

This program is available to all AmeriHealth Administrators in-network physicians.

The advantages of using the Direct Ship Drug Program include:

- AmeriHealth Administrators places the order with the vendor based on the physician's request and handles all payments for the drugs.
- Physicians do not have to submit reimbursement forms for the cost of the drugs.
- Physicians do not have to dedicate office space to long-term drug storage.

Direct Ship Drug List

See a complete [list of office-administered drugs](#) that are available through the Direct Ship Drug Program. This list is subject to change.

Ordering

To place an order, select the appropriate drug request form below. FAX the completed form, along with a valid prescription, to the number listed on the form. If the drug you are ordering is on the Direct Ship Drug List, but does not have a corresponding form below, use the [General Request Form](#).

Requests are subject to the terms of the plan member's benefit contract, as well as medical necessity review and precertification requirements set forth by AmeriHealth Administrators. For drugs that require precertification, the request forms below also serve as the precertification request. *All drugs ordered through the Direct Ship Drug Program require prior authorization from AmeriHealth Administrators, even if they are not included on our precertification list.* Requested quantities will be evaluated to ensure appropriate prescribing limits.

Specific Drug Request Forms

These forms should only be used to request the specific drug(s) listed below.

[Botulinum toxins](#) (Botox®, Dysport®, Myobloc®, Xeomin®)
